

4 Tips for Picking the Ideal Retrofit Kit

Walking past the hot tub on the way to the pool could mean overlooking a potentially lucrative revenue stream. Repairing and updating old hot tubs is a good business that has gotten easier with the Balboa Direct Spa Retrofit Kit.

Here are four tips for picking a kit that is easy and opens up the door to other revenues in the backyard.

✓ TIP 1 Easy Plumbing

The Value Pack Retrofit Kit may be plumbed to either the pressure or suction side of the pump. This means more flexibility by using the same kit, therefore storing less inventory and making fewer trips to the job site.

✓ TIP 2 Size Matters

Many older pneumatic systems were considerably larger than this new electronic kit that is compact and fits into tight spaces. Also, a kit with flexible (left/right) plumbing options will open up space that will make the job go smoothly.

✓ TIP 3 One-Stop Shopping

The comprehensive Value Pack includes:

1. A VS spa control system
2. A choice of three topside panels and an appropriately sized bezel to fit into & cover the hole created by the existing control
3. Light assembly
4. All of the cords needed to complete the installation

✓ TIP 4 Making Money

Between product markups and service time, an average retrofit can bring in \$500-\$800 but the potential value of an ongoing revenue stream from weekly hot tub service can be substantially more over time.

Bringing an old tub into the 21st century is less expensive for the customer than buying a new tub. It also enhances the customers' experience and increases their use of an existing tub, which is likely to lead to future projects and customer referrals. Stock less inventory, tie up less space and start making more money today.

VS ValuePack New Retrofit Kit

- Easy to install & service
- Integrated functionality
- Built on patented M7 sensor technology
- Custom designed plastic enclosure
- Has a 3.0kW heater and supports mini, duplex or standard digital panels

VS Series Retrofit Kits

Next Generation of Entry Level Hot Tub Control Systems

The VS Retrofit Kit family of hot tub control systems were designed using Balboa's patented M7 temperature and flow sensor technology and a new universal control platform. These features increase the reliability, ease of installation and serviceability of the control.

Designed for Easy Installation & Service

The VS family is based on a common universal control platform, which increases feature flexibility while reducing installation and configuration problems. The VS family has exceptionally good feature flexibility, so its performance is competitive with much higher end products.

Flexible, Highly Reliable, Feature Rich

The systems have a plastic enclosure to eliminate water intrusion. Connectors are built onto the circuit board minimizing wires and simplifying service. The different models have controls for a single two-speed pump or an additional blower or pump. It has a 3.0kW heater, and supports mini, duplex or standard digital panels.

KIT P/N	54216-Z	54217-Z	54218-Z	54219-Z	54220-Z

Panel Dimensions (cm)	16.05 x 5.72	16.05 x 5.72	18.67 x 8.28	11.02 x 4.01	11.02 x 4.01	
Adapter P/N	11109	11109	10165	No	No	
Overlay P/N*	No	10752	10402	No	11127	

Kit also includes all necessary cords, an appropriately sized bezel, and one 12V bulb assembly.

Why the Value Pack Retrofit Kit

The Value Pack Retrofit kit is based on the Value Series (VS) family of hot tub controls which were designed using Balboa's patented M7 temperature and flow sensor technology. The VS systems have a plastic enclosure to eliminate corrosion and suppress water intrusion. Also, the connectors are built onto the circuit board to minimize wires and simplify service. Rest easy knowing you're working with a kit that is known for reliability, ease of installation and serviceability.

* Replacement panel overlay to be used when no blower is installed. Contact your distributor for retrofit kit pricing and availability.

Due to current UL limitations, check with your sales representative for specific combinations.
