Introducing the GS100 System, and update on a popular classic

The GS100 inherits the essence of Balboa's line of spa systems. It uses our classic, easy to operate panels, has minimal features needed for comfort, and is trustworthy. The GS100 is readily compatible with either domestic 120V or 240V input voltages for ease of installation. The pump has two speeds for two levels of comfort, and the soft EFX lighting adds to a comforting sensuous experience.

Common Specifications

Voltage: 230V, 50Hz, 12A

Heater: 230V 2.0kW

Measurements
